I. INTRODUCTION

The introduction and motivation of the work.

Some directions for the paper:

- Figures and graphics are encouraged for making the report richer.
- **The sections proposed here are not hard-constrained.**
It means you can propose other sections as well as change the existing ones.
- Please number citations consecutively within brackets [1].

II. ACTIVITIES

The state-of-the-art research (about prior work for solving the same problem).

III. PROPOSED SOLUTIONS

The proposed solutions for the selected problem.

IV. EXPERIMENTS AND DISCUSSION

The experiments carried out and the obtained results.

V. CONCLUSIONS AND FUTURE WORK

The main conclusions of the work as well as some future directions for other people interested in continuing this work.
